STUDIO TOUR & YEAR END PARTY

an **EVENT** you **DON'T**
want to **MISS!**

WHEN	SUNDAY JUNE 8TH
TOUR TIME	10:00 AM TO 6:00 PM
PARTY TIME	2:00 PM @ NANCY WORDEN'S

Come celebrate another bustling year! The Guild would like to invite all of its members to the annual Studio Tour that will converge in the neighborhoods of Georgetown, Capitol Hill and South Seattle. The tour begins at Jana Brevick's studio on Capitol Hill. Nancy Worden has graciously offered to host the final studio and potluck party. We will also visit Peter Requam's New Art Projects Studio Co. All artists are of considerable talent and honors. For more information please contact Lulu Smith at 206-323-4669 or email lulu@speakeasy.org

SEATTLE METALS GUILD

May/June?

BIMONTHLY NEWSLETTER

JULY/AUG 2003

WORKSHOP

ALMOST INSTANT JEWELRY

with Ken Bova

WHEN	August 16, 17, 2003
WHERE:	North Seattle Community College
DEADLINE:	July 15, 2003
COST:	\$115 for members

FREE LECTURE Friday, Aug. 15, 2003 at 7pm
WHERE North Seattle Community College

Please don't miss this well known artist's workshop! Ken Bova teaches jewelry/metals at Montana State Univ. His credits include extensive presentations of workshops and lectures throughout the U.S. He has exhibited in many galleries, including the Smithsonian; is well published, has won numerous awards and grants, served on many committees and was recently elected President of SNAG.

Ken Bova, using a "Soft-Tech" approach and hand-tool technology, will explore the possibility and processes in creating personal jewelry with relatively quick and satisfying results. We will examine the path that leads from idea to the finished piece. Projects will focus on personal approaches and developing technical and design skills quickly and effectively. He will cover how we can spark and capture ideas, designs, fabrication, and assembly techniques that are direct and (almost) immediate, bench tricks, as well as tools, materials, and resources for jewelry making.

This workshop is for all levels. Some jewelry making experience would be helpful, but is not necessary. Both the lecture and workshop will be held at North Seattle Community College.
